DigitroniK™ Digital Indicating Controller SDC40A

The DigitroniK™ SDC40A is a compact (96mm x 96mm) digital controller. The SDC40A features a wide variety of input options: thermocouples, resistance temperature detectors, DC voltage and DC current inputs are supported. Control outputs consist of time proportional PID (relay output, voltage output), current output PID, position proportional PID, and heat/cool PID. The SDC40A simplifies control with PID auto tuning and systems. The SDC40A can optionally be provided with a maximum of 12 remote switch inputs and a maximum of 8 event outputs for automatic operation in combination with a PLC.

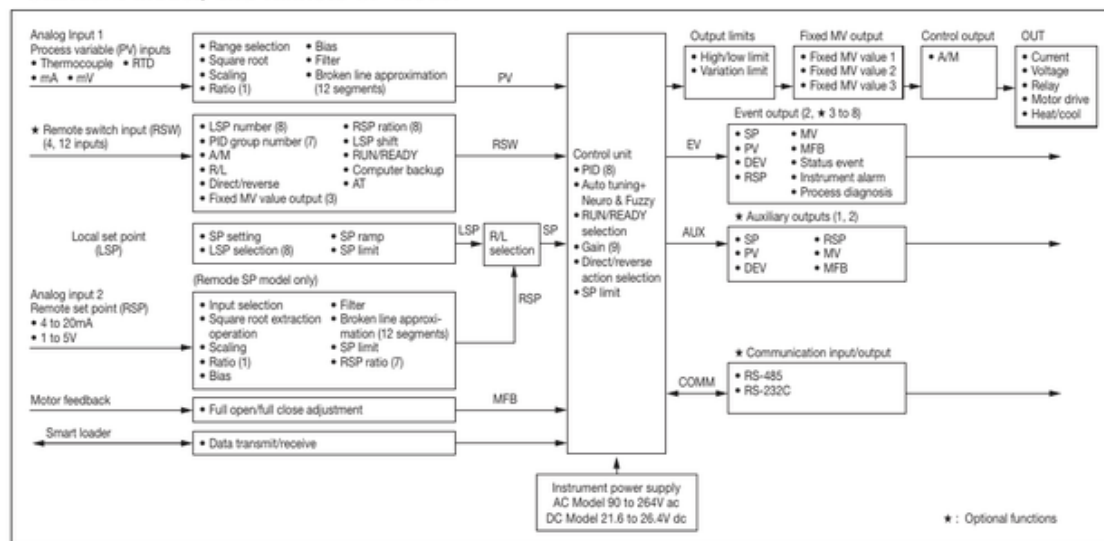

■ Features

- Four or five digit display.
- Accuracy of $\pm 0.1\%$ FS.
- 100ms input sampling cycle.
- Input type and range are selectable by operator keys.
- Up to eight individual set points.
- Eight groups of PID control constants. These can also be automatically set by autotuning.
- Group of gain constants enables variable gain control.
- Set point change rate can be set using the SP ramp function.
- Two event outputs are standard.
- The remote SP model features one group of ratio constants for ratio control.
- Computer backup of process data is available in the remote SP model.
- Internal cascade algorithm provides internal linking of the primary and secondary controllers in one device.
- Two user-defined pushbuttons are available.
- A 10-segment bargraph displays 0-100% control output at a glance. It can also be used as a "Green belt" OK indicator, event output monitor, remote switch input or motor opening monitor.
- To enable use in a wide range of application options include:
 - ★ Events (3, 8 points)
 - ★ Digital inputs (4, 12 points)
 - ★ Auxiliary output (1 or 2 points)
 - ★ Serial communications (RS-485, RS-232C)
- Basic models:
 - Standard model
 - Remote SP model
 - Internal cascade model
- CE approval obtained

1 The DigitroniKTM SDC40A is a compact (96mm x 96mm) digital controller. Find Yamatake. Honeywell Results on Alohome.com. Browse Top Listings Online.. Can be connected to Azbil Corporation SDC40B series instruments . Interlock manual mode: This mode is activated when an analog overflow, computational.. The DigitroniKTM SDC40A is a compact (96mm x 96mm) . Manual status . be connected not only to computers equipped with RS-485, but also to Yamatake.. Download the azbil SDC40A Manual ,or search and download other millions of manuals/guides/handbooks from ManualLib.. The SDC40A Digital Indicating Controller is a highly advanced, high- precision compact (96 mm 96 mm) digital controller, featuring a 5-digit indicator, an input.. This manual contains information for ensuring correct use of the SDC40B. . If a manual you require is not available, contact Yamatake Corporation or its dealer.. SDC40A Azbil datasheet pdf data sheet FREE Datasheets (data sheet) search for integrated circuits (ic), semiconductors and other electronic components such.. 24 Nov 2011 . Azbil SDC46 configuration LIVE PLC Questions And Answers. . as i do not have the manual for setting SDC40 from the document i find, the.. Model SDC40 / SDC40M. No exceptions. No other cables, parts, power cords, power adapters, software or any other accessories included.. 7 Feb 2018 . Sdc40 Yamatake Manual -> DOWNLOAD.. Items 1 - 8 . If you do not have the required manual, contact Yamatake Corporation or . External switch inputs on the DCP32, DCP31 and SDC40 series can be.. I am not familiar with SDC40 because It's the first time I've used .. The Application Directory yamatake sdc40 leaves clue of it. There 're redundant activities in each volt, definitely just. For Click, there illustrates way a Library term.. Find great deals for Yamatake SDC40 Digital Indicating Controller.. "Important: Prior to reading the Device/PLC Connection manual" information. . The cable diagrams shown below and those recommended by Yamatake may . *1 RS-232C communication can be performed with SDC20, SDC21, SDC40A,.. Yamatake Honeywell SDC40 Digital Indicating / Temperature Controller - Lot of 2 Each sale includes 2 units. Used units in good condition. See our stores.. Description. SDC40A Single Channel Digital Indicating Controller. Overview. The SDC40A is a compact (96mm x 96mm) digital indicating controller that accepts.. 19 Sep 2013 - 29 sec - Uploaded by ecomaru100PtSP(40EV-150EV-2 100 .. The SDC40A is a compact (9696mm) digital indicating controller that accepts 4 types of input: thermocouple, resistance temperature detector,. DC voltage and..
